

Davin Theng

Westford, MA 01886 • Davinthe9155@gmail.com • 978-885-4702 • [LinkedIn](#) • [Github](#)

Objective

"Seeking a full-time entry-level position in software development, with openness to hardware-related roles. Eager to contribute strong programming and hardware integration skills to a collaborative engineering team."

Education

University of Massachusetts Lowell – Lowell, MA

Bachelor of Science in Computer Engineering • Graduation: May 2025 • GPA: 3.2

Relevant Coursework: Electronics II, Microprocessor II, Advanced Digital Systems, Operating Systems, Computer Architecture

Westford Academy – Westford, MA

Robotics Club (2019–2020) – Programmed robotic manipulators for movement and articulation

Technical Skills

Programming Languages: MIPS, Assembly, C, C++, Python, VHDL

Relevant Applications: MPLAB, MATLAB, Quartus Prime, NI Multisim, Arduino, Linux, Visual Studio Code

Relevant Hardware: Digital Multimeter Bench-top, Oscilloscope, Function Generator, Power Supplies, Microcontrollers, Arduino

Languages: English (fluent), Khmer (conversational)

Key Projects

Visual Timer for Kin:pathic – Lead Programmer – December 2024

- Designed and developed a child-friendly visual timer using personalized images to indicate the passage of time.
- Built intuitive UI and image display logic using Python and Pygame.
- Focused on accessibility for children with autism; collaborated with a multidisciplinary team.

MIPS Microprocessor Dice Game – Developer and Designer - December 2023

- Created a two-player dice game on a PIC32MM Curiosity Development Board.
- Programmed timer functionalities, interrupts, and ADC inputs.
- Displayed rolled values on a 7-segment display using hardware-level C.

Audio Amplifier Circuit – Independent Project June 2023

- Constructed a low-power audio amplifier using the LM386 IC.
- Gained hands-on experience with circuit design and signal analysis.
- Used test equipment such as oscilloscopes and multimeters to evaluate performance.

Work Experience

Pailin Jewelry – Lowell, MA, May 2018 – Current

Gold Price Monitoring Tool

- Developed a software tool to track historical gold prices and analyze pricing trends.
- Created automated calculations to estimate item values based on weight and market conditions.
- Generated reports to support purchasing and pricing decisions.
- Improved efficiency by reducing manual price calculations.

Teacup Boba House – Austin, TX, June 2019 – September 2019

Digital Inventory Tracking Tool

- Developed an inventory management application to track ingredient consumption and stock levels.
- Automated reorder notifications for frequently used supplies.
- Generated inventory usage reports to support purchasing decisions.
- Improved inventory planning and reduced stock shortages.
